## 12,139 NEW COMPANIES ARE PROBATED

Secretary of State Reports Shows Incorporations for Past Six Months

ALBANY, July 6.—Practically every county in the state did its part in bringing about a remarkable increase in the number of stock companies that have incorporated during the first six months of this year. The figures show that 12,139 new companies have been incorporated from January 1 to June 30, 1925. This is a gain of 3,008 companies over the same period of last year. During the past six months there has been an increase of 249 over the same period in 1924. Everything points to a record breaking year for the incorporation bureau having reached two million dollars, an increase of nearly \$400,000 over the same period last year.

The old and curious cropped hair custom among companies incorporating, so long as men are in the majority, will probably be hair-tonics, the latest coming during the past month when a company incorporated to turn out a tonic that may do the trick. A concern to raise floss and another to promote boxing were also formed. Radio slumped somewhat, with a total of 45 new companies for the month. Winter's approach was heralded by 65 new garment-making concerns. Real estate included 637 more companies. In Stenben county 10 companies were incorporated during the first six months of this year compared with 12 during the same period a year ago.

BE CAREFUL, MADAM Palmolive complexions do not come from other sorts of "olive oil" soaps

WE have led millions of women to expect fine complexions from olive and palm oils, as used in Palmolive Soap.

They have gained added beauty and fresh, clear skins. But some credit those results to olive and palm oils alone. And any "olive and palm" soap may claim to be a soap like Palmolive.

They are mistaken. Olive and palm oils have been used for ages. Cleopatra used them—Roman beauties used them. Castile soap—the real castle—attained its fame on olive oil alone.

But olive and palm oils in those forms never brought great results. Palmolive Soap has brought new beauty to millions. It has thus become the leading toilet soap of the world.

It is made in five countries to supply the world demand. And one is France—the home of fine cosmetics.

Just because Palmolive, based on 60 years of soap study, gives to these oils a new effect on the skin.

It has multiplied beautiful complexions. Now many times as many women keep their youth and charm.

There are soaps at 25 cents and over, which approach Palmolive in results. We know of two. But Palmolive sells at 10 cents—no more than ordinary soaps. Economical product brings you this modest cost.

Now countless "olive and palm" soaps are offered for like purpose. Some have artificial colors, some are over-fatted. They will cleanse, if you want mere cleansers. But don't expect such soaps to bring Palmolive results to the skin. That is impossible.

Note the unnatural "too green" color of Palmolive imitators. What does that suggest? Men don't paint nature to improve it.

Olive and palm oils—nothing else—give Palmolive its delicate, natural color. Olive and palm oils—no other fats whatsoever—are used in Palmolive.

No "super-fating," no "super-anything"—the only secret to Palmolive is its blending. And that is judged one of the world's priceless beauty secrets.

Wash, launder, cleanse with any soap you wish—but when beauty is at stake, take care. Use Palmolive, a soap you know is safe to use. Palmolive is nature's formula to "Keep That Schoolgirl Complexion."

Soap from Trees

The only oils in Palmolive Soap are the soothing beauty oils from the olive tree, the African palm and the coconut palm—and no other fats whatsoever.

That is why Palmolive Soap is the natural color that it is—for palm and olive oils, nothing else, give Palmolive its green color.

The only secret to Palmolive is its exclusive blend—and that is one of the world's priceless beauty secrets.

Newly Organized Painted Post Team Plays Scheduled Exhibition Against Penn Yan Campers Visiting Here.

### GREB'S MANAGER IS HURT BY FIREWORKS

PITTSBURGH, July 6. (AP)—James Mason, manager of Harry Greb, who was killed in a crash Sunday at Imperial Park, was in a hospital today facing the possibility of losing the right of his left eye in consequence of a Fourth of July accident Saturday night. A firecracker exploded prematurely as he was bending over it, hitting the eye with a bit of powder and slightly injuring the right eye.

### Tales of a Wayside Tee

By Grandland Rice

"If you could select a golf game for your own?" writes L. H. P. picked from the leading stars of the game and would you nominate him as made?"

We have a vague, silly idea that it would be a good idea to go through such brief extracts as may be selected from the list of names as follows:

1. Wooden club play—Bobby Jones.

2. Long iron—Willie Macarian, Mac Smith.

3. Pitch shoe—Jock Hutchison.

4. Recovery shots—Bobby Jones.

5. Putting—Walter Hagen.

Bobby Jones is the finest wood club player we have ever seen. His style is free and yet compact, with long and yet always with control in reserve. There is a picture to look at and his results are consistently brilliant.

Mac Smith is a player who is a picture to look at and his results are consistently brilliant. He plays for no allies or no, no fancy strokes. He is a man to hit the ball with a long carry. Jones' great advantage. There is nothing more helpful than to hit, drive far and true, leaving him in position for the second shot from the right spot.

Among the best long iron players in the world are Mac Smith, Johnny Farrell and Jock Hutchison. Mac Smith is a player who is a picture to look at and his results are consistently brilliant.
